	Sections 1B & 2B (Delivered Class 1 and Delivered Class 2) are for "productive road paving" with a maximum 30 minute unload time.		Liquid escalation to be calculated based on current pricing as per State of CT V.I.P. Contract.	American Industries uses the following formula to determine price escalation: average is based on the high and low selling price published in the most recent available issue of the Asphalt Weekly Monitor under the "East Coast Market - New England, New Haven, Connecticut area", FOB manufacturer's terminal.
				The selling price furnished from the Asphalt Weekly Monitor is based on a standard ton (US\$/ST). Formula: HMA X PG% x [(Period Price - Base Price) = \$100
